

This engine is for serious competition use, high-powered with 3.5 cc capacity, for 1:8 BUGGY car models, specially designed for use in racing.

It is supplied with a "C - Conical" glow plug, which considerably improves engine performance in terms of both power and regular functions, whilst reducing fuel consumption.

Anyone wishing to use the "S - Standard" plug has to replace only the head gasket, found in the spare parts list for this engine.

The air reducers on the carburettor can be exchanged, thus adapting the engine functions to various types of tracks and different driving styles. The 7.5 mm reducer is part of standard supply, but spare parts include all sizes from 5 mm to 9 mm.

### **Standard accessories included with each engine kit:**

**Conical glow plug C7** (Mounted directly on engine, code FA7C).

**0.1mm Head gasket** (1 piece code FA1323).

**Exhaust gasket** (1 piece code FA1921).

**Manifold fastening spring** (4 pieces code FA1920).

**Crankshaft Cone** (1 piece code FA1520).

**7.5 mm carburettor air reducer** (Mounted directly on engine, code FA1036).

**Engine protection cover** (Mounted directly on engine, code FA1922).

**Use and Maintenance Manual on CD in 2 languages** (1 piece code FA1923)
